

## 1. Login

The Forgot password does not work. I receive an email with a plain code. (should be a hyperlink/URL)  
When I copy it into the browser and reset the password. It says the changes were successful. However, when I try to login with the new password i get the error, that the password or username is incorrect.

Does the user only see the data records (DataViewNote) of his company? I can not check, since I can not create a new user.

## 2. New DataView

Lfd Nummer	33	Aggregatzustand		Übersicht	
PDF Name	2-Propanol.pdf	<input checked="" type="checkbox"/> fussig		Klassifiziert	2
handelsname	2-Propanol	<input type="checkbox"/> fest		Offen	5
sidepunkt	82 - 83°C	<input type="checkbox"/> Gas/Aerosol		Total	7
bearbeitetam	ok				
				<a href="#">Finde nächsten Stoff</a>	
Mengengruppe	<a href="#">←</a> 2 <a href="#">→</a>	freisetzungsguppe			
<input checked="" type="radio"/> klein		<input checked="" type="radio"/> niedrig			
<input type="radio"/> mittel		<input type="radio"/> mittel			
<input type="radio"/> grob		<input type="radio"/> hoch			
wirkungsdauer		wirkfläche			
<input checked="" type="radio"/> kurze		<input type="radio"/> kleine			
<input type="radio"/> lange		<input checked="" type="radio"/> grobe			
<div>Zurück Speichern</div>					

In case a user has already assigned values to Mengengruppe, freisetzungsguppe, wirkungsdauer and wirkfläche, every time the the data record is shown again the checkboxes should be filled.

Bearbeitetam should be the data of choosing the checkboxes.

The checkboxes fussig, fest Gas/Aerosol should only have one selected. Not more than 1.

After Admin has approved the checkboxes the data of the selected checkbox (Mengengruppe, freisetzungsguppe, wirkungsdauer and wirkfläche) needs to be saved to the database and need to be visible on the DataNoteView(=next picture). (I did not find this feature)

So user of company A only sees data records of company A and user of company B only sees data records of company B.

Dashboard:

If I is clicked user needs to be rerouted to DataviewNote. If II is clicked user needs to be rerouted to "gerarhh"view
